

# MANAGING YOUR WIRELESS CONNECTIONS

Case 1: You're able to use your wireless throughout your residence effectively without being affected by neighbors or affecting them.

Case 2: Same as Case 1 except you can't reach some areas of your residence with a wireless connection.

Case 3: You are able to use your wireless in some areas of your residence but have interference from neighbor(s) in other areas.

Case 4: Can't effectively use normal wireless in your residence.
